Mr. B. K. Jones
1714 S. Beverly Glen Blvd.
Los Angeles, California 90024

Dear Mr. Jones:

Your letter requesting water data in the Mineral King area was received in our regional office and referred to this office for reply.

The Geological Survey began collecting streamflow data on three new gaging stations on the upper East Fork Kaweah River in Mineral King in September 1968. The streamflow records for the four month period, September to December 1968, are now being computed in our subdistrict office in Sacramento. Preliminary figures for these four months will be available in February.

By copy of this letter we are requesting our Sacramento subdistrict office to send you copies of the preliminary figures when they are available. Our streamflow records are published on a water year basis, from October 1 to September 30, therefor a full years record will be available when the records are computed after September 30, 1969.

Sincerely yours,

R. Stanley Lord

Los Angeles, California 90024

Dear Mr. Jones:

The computations of the streamflow data for East Fork Kaweah River near Hammond and East Fork Kaweah River at Three Rivers for the period Sept.-Dec. 1968, which you requested, have not yet been completed because of difficulties and manpower shortages associated with the recent floods. The preliminary data requested will be sent to you as soon as it becomes available.

Very truly yours,

R. Stanley Lord

June 24, 1969

Mr. B. K. Jones
1714 S. Beverly Glen Blvd.
Los Angeles, Calif. 90024

Dear Mr. Jones:

Enclosed are preliminary streamflow data and a location map for the following recording gages in the Mineral King area:

11-2086.1	Monarch Creek near Hammond (No. 3 on enclosed map).
11-2086.25	East Fork Kaweah River at Sequoia National Part Boundary near Hammond (No. 6 on enclosed map).
11-2086.2	East Fork Kaweah River below Mosquito Creek near Hammond (No. 5 on enclosed map).
11-2087.3	East Fork Kaweah River plus East Fork Kaweah River No. 1 conduit near Three Rivers (No. 15 on enclosed map).

We are sorry to have delayed this transmittal for so long but recent floods transferred our priority commitments and have delayed computation for this report.

We hope that the enclosed streamflow data meets your requirements. However, if you need further information, there will be available for public release, a report which includes information of water quality with respect to dissolved solids, temperature, sediment, and biological parameters. The title of this report is, WATER QUALITY AND QUANTITY MONITORING EAST FORK KAWEAH RIVER BASIN. This report will be available about the middle of next month. We will be pleased to furnish this further information if you need it.

Sincerely yours,

for Willard W. Dean
Chief, Sacramento Subdistrict
